## Ohmx Announces Patent Awards

**Evanston IL, March 31<sup>st</sup> 2010** – Ohmx Corporation, a bioelectronic detection company focused on developing a near-patient analyzer for monitoring of chronic diseases at home, is pleased to announce that two additional patents have recently been issued by the U.S. Patent and Trademark office. U.S. Patents 7,582,419 and 7,595,153 describe methods for detecting analytes using changes in reorganization energy and electrodes modified with redox metal species.

These patents continue the expansion of Ohmx's intellectual property portfolio and are invented by Thomas J. Meade, founder of Ohmx and Chairman of the Board of Directors.

"We are committed to expanding our portfolio of intellectual property for Ohmx's portable, low cost, and simple to use home diagnostics platform and to translate these ideas into products for the patient to monitor their health at home." commented Gary Blackburn, President and CEO of Ohmx.

---

### **About the Company:**

Ohmx is advancing e-Diagnostics by developing a home monitoring device that quantifies clinical biomarkers and other important disease indicators from the blood of a single finger prick. Ohmx's handheld monitoring device is electronic, low-cost, user-friendly, contains advanced communications protocols, and can be used as a near-patient analyzer in the convenience of the patient's home. Home monitoring of patient's health with Ohmx's devices will allow much more frequent transfer of information to healthcare providers and better healthcare for chronic disease patients than today's paradigm which require a visit to the doctor's office for blood testing.
